

The MBA Series Residential Water Softeners

Quality That Lasts

- Two Tank or Self-Contained cabinet models.
- 10 Different models for treating hardness, iron and manganese.
- Durable, high capacity cation softening resin.
- Over 2 decades of proven performance.
- 6 or 7 day timer assembly to fine tune the softener's regeneration frequency.
- One of the best control valve and tank warranties in the business.
- Free factory water analysis and equipment recommendations.

BENEFITS OF CONDITIONED WATER

Conditioned water enhances the effectiveness of cleaning agents which helps save on detergents, cleaners, soaps, shampoos and conditioners. Soft water makes laundry come out cleaner and brighter. Dishes and glassware sparkle because soft water helps reduce spotting and residue. Bathing and washing in conditioned water gives hair a naturally clean and lively sheen and leaves skin feeling soft and smooth.

Soft water is better for your splitting hairs.

Beverages, soups, foods and drinking water all taste fresher. Conditioned water enhances their flavor and appearance.

Hardness, Iron and Manganese precipitates in your plumbing fixtures and water using appliances. The mineral scaling not only deteriorates your plumbing fixtures and water using appliances but can decrease their efficiency. As little as 1/8" of hardness scale on a water heater element will reduce heating efficiency by 20%. In fact, a recent study proved that heating hard water with an electric or gas hot water heater consumes 21% to 29%

more energy than if one were heating soft water.

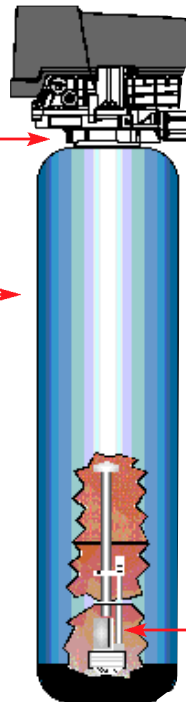

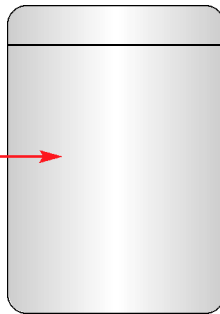

Give your plumbing a clean bill of health with soft water.

Automatic, 5-Cycle Water Softener Control constructed of non-corrosive Noryl®. The control valve automatically starts a regeneration cycle at 2:30 A.M. The 255 3/4" control valve is designed with a unique separation principle that makes servicing the unit a snap! In fact, all replacement modules are factory rebuilt and replaceable in minutes. All factory rebuilt modules are guaranteed for one year and the new control valves are guaranteed for five years.*

The Polyglass mineral tank is non-corrosive. It carries the National Sanitation Foundation seal which means it is built to last. We guarantee our Polyglass tanks for 12 years.*

Brine tank is constructed of non-corrosive Virgin Polyethylene and is guaranteed for 12 years.* The only brine tank maintenance is keeping it filled with salt and Iron Out.

***Detailed warranty information accompanies each water conditioner.**

MBAC Self Contained Cabinet

Optional MP MasterMind Computerized Meter

Turbulator is a plastic distributor system that uses a unique Water-Stream Compression device to shoot the softening resin granules to the top of the softener bed. This agitation extends the life and the hardness and iron removal capacities of the softening resin.
